ACCESS · INDIGENOUS SKILLS 4 SUCCESS

Read the hazard. Protect the crew.

WHMIS pictograms, machine warnings and the documents that explain them.

ASPHALT · CLASSROOM EDITION · 30 OCTOBER 2026

9 + 1	3	7
WHMIS set + environment	SVG · PNG · EPS formats	Official source PDFs

Recognize the symbol. Read the whole message.

A pictogram alerts you to a type of hazard. The label and safety data sheet (SDS) explain the particular product and its precautions. The same work area can also have machine warnings, traffic signs and emergency signs; each has a different purpose.

In an asphalt crew, check the actual products used for the task: fuels, cleaners, release agents and other supplied materials. Do not assign a WHMIS classification from the word “asphalt”, a container colour or a familiar brand.

> Some WHMIS hazard classes and categories have no required pictogram. No pictogram does not mean no hazard. Check the product identifier, complete label and SDS Section 2.

This classroom material develops WHMIS understanding. The employer also provides training for the actual hazardous products, tasks, controls and emergency procedures at the workplace.

Current teaching basis: CCOHS fact sheets revised 28 May 2026, reflecting the December 2022 HPR amendments. The two WorkSafeBC books in the source pack are labelled as 2019 historical explanations.

The pictogram library

Official CCOHS artwork, retained in its standard form. SVG files are faithful vector conversions of the supplied EPS artwork. Frame, symbol and colours have not been redesigned.

Flame over circle

Oxidizing hazards. Can cause or intensify fire. Read the actual product's hazard and precautionary statements.

SVG · PNG · EPS

Flame

Fire-related hazards. Used for specified flammable, self-reactive, pyrophoric, self-heating and other fire-related classes/categories. The exact hazard is stated on the label and SDS.

SVG · PNG · EPS

Exploding bomb

Explosion or violent reaction. Used in WHMIS for specified self-reactive substances and mixtures and organic peroxides. Read the classification and conditions; do not infer them from the picture alone.

SVG · PNG · EPS

Gas cylinder

Pressure hazards. Used for gases under pressure and chemicals under pressure. The product's statements identify its particular pressure and related hazards.

SVG · PNG · EPS

Skull and crossbones

Severe acute toxicity. Used for acute toxicity categories 1–3 by the applicable exposure route. Keep the label's exact route and hazard statement.

SVG · PNG · EPS

Corrosion

Corrosion or serious damage. May identify corrosive-to-metals, skin-corrosion or serious-eye-damage hazards. Read which hazards apply to the product.

SVG · PNG · EPS

Exclamation mark

Harmful or irritating effects. Used for specified acute toxicity, irritation, skin sensitization and other categories. It does not mean “minor” or “safe”.

SVG · PNG · EPS

Health hazard

Serious health effects. Used for specified hazards such as cancer, respiratory sensitization, reproductive toxicity, organ damage and aspiration. The symbol alone does not identify which one applies.

SVG · PNG · EPS

Biohazardous infectious materials

Biohazardous infectious materials. Used for biohazardous infectious materials. This Canadian WHMIS pictogram has a circular border, not the red diamond used for the other illustrated WHMIS pictograms.

SVG · PNG · EPS

Environment

Hazardous to the aquatic environment. This GHS pictogram may appear on products, but environmental hazards are not part of the mandatory Canadian WHMIS hazard classes. Keep environmental precautions from the applicable SDS and site plan.

SVG · PNG · EPS

Canadian Centre for Occupational Health and Safety. (n.d.). *WHMIS pictograms* [Pictogram kit]. Official download page. Accessed 30 October 2026. Meanings above are concise teaching descriptions; the 2026 pictograms fact sheet gives the classes and categories.

Three sources of information

01

Identify
Match the product name on container, label and SDS.

02

Read
Read hazard statements and precautions, not just the pictogram.

03

Locate
Find task-specific information in the SDS and workplace procedures.

04

Check
Resolve missing or conflicting information with the designated person before the task.

Supplier label

Look for the product identifier, initial supplier identifier, applicable pictograms, signal word, hazard statements and precautionary statements. Required supplemental information may also apply. Supplier label information is provided in English and French. “Danger” and “Warning” are signal words; their use depends on classification.

Workplace label

A workplace label generally contains the product identifier matching the SDS, safe-handling information and a statement that the SDS is available. Requirements and limited exceptions for transferred containers depend on the circumstances and jurisdiction. Use the employer’s procedure; do not treat “only a small amount” as a reason to leave a shared container unidentified.

Find the information in an SDS

An SDS has 16 section headings. Read the current SDS for the exact product. A similar name, an old screenshot or a different supplier's sheet is not a confirmed match.

Question	Start here	Keep checking
Which product and supplier?	1 · Identification	Label and actual container
Which hazards and label elements?	2 · Hazard identification	Full statements and classification
What is in it?	3 · Composition/information on ingredients	Applicable disclosure information
First aid, fire or spill?	4 · First-aid measures; 5 · Fire-fighting measures; 6 · Accidental release measures	Workplace emergency procedure and trained response
Handling, storage and exposure controls?	7 · Handling and storage; 8 · Exposure controls/personal protection	Task, exposure and workplace controls
Properties, reactions and health effects?	9 · Physical/chemical properties; 10 · Stability/reactivity; 11 · Toxicological information	Conditions, routes and limits
Environment, disposal, transport and rules?	12 · Ecological; 13 · Disposal; 14 · Transport; 15 · Regulatory information	Headings are required; these sections' content is not mandatory under the HPR. Other requirements can apply.
When was the SDS prepared or revised?	16 · Other information	Revision and supplier updates

Teaching summary from CCOHS (2026), *WHMIS—Labels* and *WHMIS—Safety Data Sheet (SDS)*. Consult the complete sheets for conditions and exceptions.

Machine warnings have their own context

The pages below show genuine CAT roller safety messages. Hot-surface and crush warnings describe equipment hazards. A chemical pictogram on a product label describes that product’s classification. Keep the message with its location, machine and complete instruction.

Example	Where to look	What to preserve
Hot surface	CAT-10, PDF page 9, safety message 4	Location near exhaust outlet, illustration and full burn warning
Crush hazard	CAT-10, PDF page 10, messages 5 and 6	Articulation location, machine movement and frame-lock context
ROPS warning	CAT-10, PDF page 10, message 7	Complete do-not-weld-or-drill warning and model context

> Use the exact machine’s warning labels and manual during supervised training. The reproduced pages are from M0130633-02 for its listed CB2.5 GC, CB2.7 GC and CC2.7 GC serial ranges. These images are classroom references, not replacement machine decals.

CAT roller warnings · source page 9

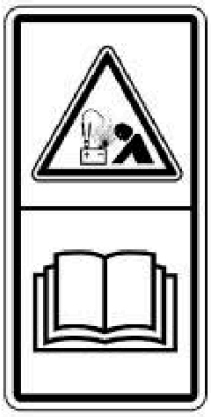

Illustration 5 g01409730

⚠ WARNING

Explosion Hazard! Improper jumper cable connections can cause an explosion resulting in serious injury or death. Batteries may be located in separate compartments. Refer to the Operation and Maintenance Manual for the correct jump starting procedure.

Hot Surface (4)

This safety message is located near the exhaust outlet.

Illustration 6 g03446436

⚠ WARNING

Hot engine components can cause injury from burns. Before performing maintenance on the engine, allow the engine and the components to cool.

Crush Hazard (5)

This safety message is on both sides of the machine near the articulation joint.

Caterpillar. (2022). *CB2.5 GC, CB2.7 GC, CC2.7 GC Utility Compactors — Operation and Maintenance Manual* (M0130633-02 (August 2022)), PDF p. 9. Full source page. Original illustration reproduced as a crop; labels unchanged. This reproduction retains the complete page.

CAT roller warnings · source page 10

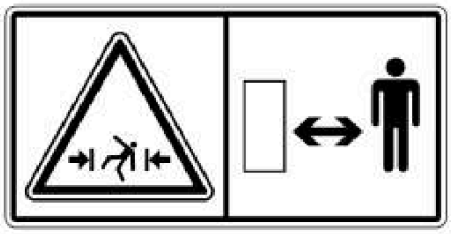

Illustration 7 g01371644

⚠ WARNING

Stay back a safe distance. No clearance for a person in this area when the machine turns. Severe injury or death from crushing could occur.

Crush Hazard (6)

This safety message is on the right side of the machine next to the steering frame lock link and on the left front frame near the articulation joint

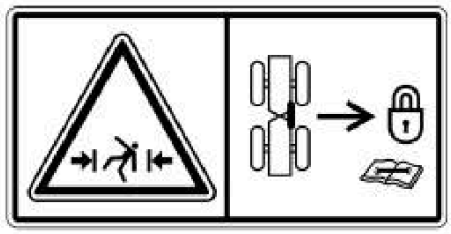

Illustration 8 g01371647

⚠ WARNING

Connect the steering frame lock between the front and the rear frames before lifting, transporting, or servicing the machine in the articulation area. Disconnect the steering frame lock and secure the steering frame lock before resuming operation. Severe injury or death could occur.

Do Not Weld or Drill (7)

This safety message is on the post for the ROPS (Rollover Protective Structure).

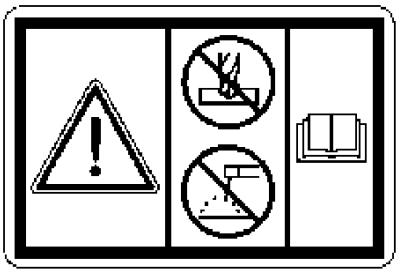

Illustration 9 g01226901

⚠ WARNING

Structural damage, an overturn, modification, alteration, or improper repair can impair this structure's protection capability thereby voiding this certification. Do not weld on or drill holes in the structure. Consult a Caterpillar dealer to determine this structure's limitations without voiding its certification.

Certification for Rollover Protective Structure (ROPS) and for Falling Object Protective Structure (FOPS)

Caterpillar. (2022). *CB2.5 GC, CB2.7 GC, CC2.7 GC Utility Compactors — Operation and Maintenance Manual* (M0130633-02 (August 2022)), PDF p. 10. Full source page. Original illustration reproduced as a crop; labels unchanged. This reproduction retains the complete page.

Source shelf

The five CCOHS sheets below are the current teaching sources in this dated collection. The WorkSafeBC books remain useful B.C. background, with their 2019 editions visible.

- Canadian Centre for Occupational Health and Safety. (2026). *WHMIS — Pictograms*. 7 pages. Current CCOHS fact sheet reflecting the December 2022 Hazardous Products Regulations amendments. Original download.
- Canadian Centre for Occupational Health and Safety. (2026). *WHMIS — General*. 9 pages. Current CCOHS fact sheet reflecting the December 2022 Hazardous Products Regulations amendments. Original download.
- Canadian Centre for Occupational Health and Safety. (2026). *WHMIS — Labels*. 11 pages. Current CCOHS fact sheet reflecting the December 2022 Hazardous Products Regulations amendments. Original download.
- Canadian Centre for Occupational Health and Safety. (2026). *WHMIS — Safety Data Sheet (SDS)*. 13 pages. Current CCOHS fact sheet reflecting the December 2022 Hazardous Products Regulations amendments. Original download.
- Canadian Centre for Occupational Health and Safety. (2026). *WHMIS — Education and Training*. 6 pages. Current CCOHS fact sheet reflecting the December 2022 Hazardous Products Regulations amendments. Original download.
- WorkSafeBC. (2019). *WHMIS 2015: At Work*. 104 pages. Historical B.C. explanatory book. Predates the December 2022 amendments; use the current CCOHS sheets and current B.C. requirements for changes. Original download.
- WorkSafeBC. (2019). *WHMIS 2015: The Basics*. 68 pages. Historical B.C. explanatory book. Predates the December 2022 amendments; use the current CCOHS sheets and current B.C. requirements for changes. Original download.
