## Try it and explain your thinking

### Explain sleep debt and circadian timing in your own words

Explain sleep debt and circadian timing in your own words. Separate observed signs from a diagnosis or a judgement about a person.

**Skills you use:** Reading, Communication.

### Recalculate the worked case if a late task adds 90 minutes

Recalculate the worked case if a late task adds 90 minutes. Explain the scheduling implication without declaring an individual fit or unfit from arithmetic alone.

**Skills you use:** Numeracy, Writing, Problem solving.

### Compare the retained CCOHS content with your workplace training checklist

Compare the retained CCOHS content with your workplace training checklist. Create, peer-test and save a fatigue-reporting flow that includes a safe transport-home question.

**Skills you use:** Digital, Collaboration, Adaptability, Creativity and innovation.

## Show the skill in supervised practice

Machine/model/serial or classroom case: _____ · Manual/procedure and revision: _____ · Date/location: _____ · Learner/observer: _____

Record each criterion as 0—not yet demonstrated, 1—with task-solving support, or 2—independently under the stated conditions. Mark unobserved criteria separately; do not convert missing opportunity into a zero. The assessor determines the required repeat practice and applicable qualification requirements. A critical failure means hold, correction and reassessment regardless of the numerical result. Use safe simulations for classroom reasoning; actual operation requires the selected equipment, approved conditions and competent supervision.

| What the observer checks | Result | Evidence |
|---|---|---|
| **Critical:** Safe access, surroundings and communication maintained. | Pass / hold | Observation: _____ |
| **Critical:** Required energy, heat, movement and public-access controls maintained for the actual task. | Pass / hold | Observation: _____ |
| Use fictional scenarios for classroom privacy; explain the actual confidential reporting route before workplace practice. | 0 / 1 / 2 | Evidence/help: _____ |
| Observe recognition, respectful communication, schedule checking and a safe handover/reassignment response. | 0 / 1 / 2 | Evidence/help: _____ |
| Record completed awareness learning separately from a medical judgement or a vehicle-driving qualification. | 0 / 1 / 2 | Evidence/help: _____ |

Actual conditions and support: _____

Feedback, next practice and authorized release/status: _____

Integrated practice · all nine Skills for Success

# Prepare a clear work-zone briefing

> This is a complete fictional classroom case. It does not describe an actual community, Nation, employer or project. Learners may use the supplied case without disclosing personal or cultural knowledge.

A fictional community-access project has a 90 m × 4 m work strip. The plan protects a walking route, uses a designated truck guide and requires a working broom dust-control system. At 08:20, the guide's radio fails and the broom dust-control indicator shows a fault. A draft note says "continue while the guide shouts." The crew's shift gap is 11 hours, with 2 hours travel and 2 hours other responsibilities. No safe clearance or operating temperature is supplied.

## Reading · Check the facts

Identify the controlling facts, missing information and one unsupported statement in the brief.

## Writing · Make the handover useful

Draft a concise handover with location, quantities, status and the next responsible action.

## Numeracy · Calculate and check

Show the case calculation with units and an independent reasonableness check.

## Digital · Direct AI and verify the files

Use an available AI assistant to draft a findings table and editable record from this brief. Request DOCX or a structured document, XLSX with formulas where useful, and a PDF/HTML reading copy. Audit every claim and reopen the actual outputs.

## Problem solving · Investigate the discrepancy

Explain the discrepancy, what evidence is needed and who should authorize the next step.

## Communication · Send and check the message

Brief a partner, ask for a check-back and repair one misunderstanding if it occurs.

## Collaboration · Review together

Agree reviewer/author roles, complete a review and record each person’s contribution.

### Adaptability · Respond to the change

Apply the change card, identify what changes and what stays, and revise the record.

### Creativity and innovation · Make understanding easier

Create a labelled SVG, annotated plan, short audio explanation or captioned storyboard that makes the issue easier to understand. Test it with a reader/listener and improve one useful detail.

### Change card · Use after the first attempt

The protected walking route must move because an entrance is needed; the responsible lead has not yet approved a new route.

## Individual evidence record

Keep the brief, calculation, saved work, review findings and revision. Record each person's actual contribution and support. Use Not observed, Not yet demonstrated, Demonstrated with support, or Demonstrated independently for the stated action; these are local feedback descriptions.

For AI/media work, a transcript, script or storyboard is distinct from a generated audio/video file. Name what was actually produced and inspected. Do not upload private records or community-held material without the relevant authority.
