Try it and explain your thinking

For a 2 m × 0.5 m strip at 0.04 m compacted depth, find geometric volume.

For a 2 m × 0.5 m strip at 0.04 m compacted depth, find geometric volume.

Skills you use: Numeracy, Reading.

Explain a safe handwork sequence around a manhole.

Explain a safe handwork sequence around a manhole.

Skills you use: Communication, Problem solving.

Document a supervised practice using a shovel, lute and tamper, then review with a partner.

Document a supervised practice using a shovel, lute and tamper, then review with a partner.

Skills you use: Writing, Digital, Collaboration, Adaptability.

Show the skill in supervised practice

Machine/model/serial or classroom case: _____ · Manual/procedure and revision: _____ · Date/location: _____ · Learner/observer: _____

Record each criterion as 0—not yet demonstrated, 1—with task-solving support, or 2—independently under the stated conditions. Mark unobserved criteria separately; do not convert missing opportunity into a zero. The assessor determines the required repeat practice and applicable qualification requirements. A critical failure means hold, correction and reassessment regardless of the numerical result. Use safe simulations for classroom reasoning; actual operation requires the selected equipment, approved conditions and competent supervision.

What the observer checks	Result	Evidence
Critical: Safe access, surroundings and communication maintained.	Pass / hold	Observation: _____

What the observer checks	Result	Evidence
Critical: Required energy, heat, movement and public-access controls maintained for the actual task.	Pass / hold	Observation: _____
Prepare and treat an approved joint or simulated face.	0 / 1 / 2	Evidence/help: _____
Transfer manageable material with shovel/wheelbarrow on the controlled route.	0 / 1 / 2	Evidence/help: _____
Use toothed/straight lute edges, form a transition and work around a structure.	0 / 1 / 2	Evidence/help: _____
Demonstrate approved bumping/joint techniques and coordinate compaction.	0 / 1 / 2	Evidence/help: _____

Actual conditions and support: _____

Feedback, next practice and authorized release/status: _____

Prepare a small-area finishing plan

> This is a complete fictional classroom case. It does not describe an actual community, Nation, employer or project. Learners may use the supplied case without disclosing personal or cultural knowledge.

A fictional rectangular repair is 2.5 m × 1.2 m with a 0.05 m compacted depth. The structure elevation and joint treatment are supplied by an approved drawing, but no mixture density or universal compaction allowance is given. A draft proposes heating any cooled mix with a torch and using the same loose-thickness factor on every job.

Reading · Check the facts

Identify the controlling facts, missing information and one unsupported statement in the brief.

Writing · Make the handover useful

Draft a concise handover with location, quantities, status and the next responsible action.

Numeracy · Calculate and check

Show the case calculation with units and an independent reasonableness check.

Digital · Direct AI and verify the files

Use an available AI assistant to draft a findings table and editable record from this brief. Request DOCX or a structured document, XLSX with formulas where useful, and a PDF/HTML reading copy. Audit every claim and reopen the actual outputs.

Problem solving · Investigate the discrepancy

Explain the discrepancy, what evidence is needed and who should authorize the next step.

Communication · Send and check the message

Brief a partner, ask for a check-back and repair one misunderstanding if it occurs.

Collaboration · Review together

Agree reviewer/author roles, complete a review and record each person’s contribution.

Adaptability · Respond to the change

Apply the change card, identify what changes and what stays, and revise the record.

Creativity and innovation · Make understanding easier

Create a labelled SVG, annotated plan, short audio explanation or captioned storyboard that makes the issue easier to understand. Test it with a reader/listener and improve one useful detail.

Change card · Use after the first attempt

The work boundary narrows beside a public entrance and the long lute handle would cross it.

Individual evidence record

Keep the brief, calculation, saved work, review findings and revision. Record each person’s actual contribution and support. Use Not observed, Not yet demonstrated, Demonstrated with support, or Demonstrated independently for the stated action; these are local feedback descriptions.

For AI/media work, a transcript, script or storyboard is distinct from a generated audio/video file. Name what was actually produced and inspected. Do not upload private records or community-held material without the relevant authority.
