A1 · CUT-OUT CARDS

Connect the paving process

Original introductory teaching cards • Use with **A1-Q03, A1-Q04 and A1-Q07**.

Print and cut apart if useful. The equipment cards identify a main purpose; they do not give operating instructions. The screed is a component of paving equipment. The simplified process omits additional preparation, checks and finishing work found on real projects.

Stage labels for sorting

Copy or cut each label separately. Arrange them in order and add a purpose under each.

PLACE

Purpose:

HAUL

Purpose:

PIT OR QUARRY

Purpose:

COMPACT

Purpose:

PLANT

Purpose:

Equipment and component cards

These are reading cards for the matching task; learners may consult the descriptions.

E1 • Screed

The paving-equipment component that helps control the thickness of the asphalt layer being placed.

E2 • Crusher or screening plant

A crusher reduces material size; a screen separates material by size.

E3 • Asphalt plant

Prepares the specified asphalt paving mixture.

E4 • Haul truck

Transports paving material between the supply point and work area.

E5 • Asphalt paver

Receives asphalt mixture and moves it toward the screed during placement.

E6 • Compaction roller

Compacts the placed material as part of the paving process.

Need cards for A1-Q04

Match each need to an E-code. Keep the equipment descriptions available while you check.

Need 1 • Transport the mixture

E-code:

Need 2 • Receive and move mixture toward the screed during placement

E-code:

Need 3 • Separate mineral material by size

E-code:

Need 4 • Compact placed material

E-code:

Need 5 • Help control the thickness of the layer being placed

E-code:

Need 6 • Prepare the asphalt mixture

E-code:

Partner explanation: Why do the paver and roller have different jobs? Use the cards to support your answer, then listen to your partner's restatement.
